Premium Playgrounds
ENGINEERED TO LAST

2025 | 2026

www.QualiTerra.de

**Tried, Tested and Approved by our
Playground Experts!**

Dear playground explorers and builders,

Welcome to the colorful world of QualiTerra – where play dreams come true!

Our dedicated team from Coburg, with many years of experience, is passionate about creating modern play spaces that make children's eyes sparkle – across all generations.

Whether for daycare centers, public facilities, or family parks – we design places where people of all ages can experience, discover, and play together. True happy places.

Our mission: **playgrounds with real added value** – inspiring, connecting, and delighting.

Thoughtful design and durable materials turn our playgrounds into unique spaces full of imagination, movement, and discovery. You can find more information about our quality standards starting on page 92.

This is how we create play worlds that are safe, inviting and designed to strengthen community and improve everyday life.

Dive into our collection and discover play structures that excite – children first and foremost – while combining great value with easy installation and minimal maintenance.

From the first idea to the final realization – we are here to guide you every step of the way. Feel free to get in touch with us.

Enjoy browsing and dreaming.

Your QualiTerra Team

Our Quality Promise

We stand for first-class quality and a unique range of products in innovative designs. Thanks to our extensive vertical integration, our modular systems can be quickly and individually adapted.

- ✓ High-quality aluminum posts
- ✓ Weather-resistant and splinter-free
- ✓ Easy installation
- ✓ TÜV-tested according to DIN EN 1176
- ✓ 10-year warranty

ONE PLAY STRUCTURE + MANY FEATURES = MAXIMUM FUN

What Makes QualiTerra Playgrounds Special?

Play for Every Sense – our playgrounds are much more than just places to run around. They support the holistic development of children through movement, sensory experiences, imagination, and inclusive play. Climbing, swinging, jumping, hiding, sliding, hanging, crawling, balancing, or spinning – every movement becomes an adventure that builds confidence, enhances motor skills, and improves coordination. Every detail of our structures is designed to foster dexterity, balance, interaction, and creativity in a playful way. At QualiTerra, play is not only fun – it's a learning experience that helps children grow into strong, self-assured personalities.

ADVENTURES that build strength

Slides in various designs, walkways and bridge elements, crawling tunnels, and climbing frames invite children to exciting movement challenges. They help develop **coordination, balance, and motor skills**, while giving kids **confidence and control** over their bodies with every play session.

More Movement = More Courage & Confidence

Age-appropriate climbing and climbing options provide a variety of challenges at different difficulty levels. Children **strengthen their muscles**, overcome fears, push their limits, and gain **confidence** with every small victory all through play.

Hanging and Balancing Elements
for coordination and body control

Learning and Play Elements
with applications in your language

Dive into a WORLD OF SENSES – Interactive Play & Activity Panels

Our double-sided learning and discovery panels turn play into a full sensory experience. A variety of play and movement elements, sound tubes, peek-holes, and colourful details help develop motor skills, dexterity, and creativity in a fun way. Children twist, explore, make music – and discover colours, shapes, and sounds through play.

Climbing Elements
for skill and strength

Role-Play Modules – Encouraging Interaction

Whether it's a shop, car, or ship, shared role-play activities promote language skills and social interaction. Children develop their own play ideas, spark their imagination, and nurture creativity with every adventure.

Press Office of the City of Coburg

"A complete success"

– Dominik Sauerteig, Mayor of Coburg

"The new playground in Josiasgarten, Coburg, is a perfect example of a well-planned and efficiently executed project. From the initial design to the final implementation, everything ran smoothly and quickly, making the playground ready to use in no time."

What's especially impressive is how well the playground blends into its surroundings: while the children play freely and are fully engaged, parents can relax and enjoy time with friends in the nearby beer garden. This meeting place for young and old is truly a benefit for all generations. My sincere thanks go to everyone involved who made this project possible with such dedication."

Together, we create your very own play world. Thanks to our nearly 100% in-house production, your individual ideas and wishes – such as custom company designs – can be brought to life.

LOOKING FOR A QUIET MEADOW!

Meike Sommer,
Managing Director and mom
of two sons

OUR BUTTERFLY (ITALIAN: FARFALLA) LOVES TO LAND ON LOVELY MEADOWS!

When it comes to product development, I know what matters: safety, easy assembly, and a design that inspires children. Our little butterfly is compact enough for any nursery and, thanks to its low-to-the-ground design and gentle climb, offers maximum safety – grass is all that's needed for fall protection. The plastic slide stays pleasantly cool even on hot summer days. For installers, that means quick setup, as it comes pre-assembled; for caregivers, it's perfect for the little ones. And for me, it's a product that convinces on all fronts – even when it comes to price.

Low to the ground, grass
sufficient as fall protection,
plastic slide surface

Farfalla

Consists of:

- stairs with three steps
- plastic slide with HPL side panels and butterfly applications

Technical specifications:

Dimensions (L/W/H):	230 x 130 x 300 cm
Safety zone (L/W/H):	530 x 430 cm
Max. free fall height:	60 cm
Platform heights:	60 cm
Number of foundations:	5
Fall protection recommendation:	1 - 4
Age recommendation:	1 to 3 years

Art. No. 10100310

A TRUE PLAY HERO

IS A MUST ON EVERY PLAYGROUND AND IN EVERY NURSERY

Play unites – and our play structures bring this idea to life. They create colorful worlds where every child is welcome and can find their place. Whether climbing, listening, exploring textures, or blue sky daydreams, a variety of play opportunities invite children to discover new things and share adventures.

Barrier-free access opens doors for everyone, and thoughtfully designed activity panels stimulate the senses, turning play into a rich, diverse experience. Playgrounds like these are more than just places to romp – they are gathering spots where children laugh together, learn from one another, and feel a true sense of community.

KidooPlay

Consists of:

- a variety of low to the ground, interactive play and activity panels

Technical specifications:

Dimensions (L/W):	290 x 210 cm
Number of foundations:	6
Fall protection recommendation:	1 - 4
Age recommendation:	1 to 3 years

Art. No. 10020360

Dominator

Consists of:

- stairs with handrails
- crawl tunnel featuring a peek-through window
- plastic slide with HPL side panels

Technical specifications:

Dimensions (L/W/H):	230 x 320 x 330 cm
Safety zone (L/W/H):	600 x 690 cm
Max. free fall height:	60 cm
Platform heights:	60 cm
Number of foundations:	7
Fall protection recommendation:	1 - 4

LudoLoo

Consists of:

- a variety of low to the ground, interactive play and activity panels
- including sound element
- crawl tunnel featuring a peek-through window

Technical specifications:

Dimensions (L/W/H):	375 x 260 x 260 cm
Number of foundations:	750 x 630 cm
Fall protection recommendation:	10
Age recommendation:	1 - 3 years

Art. No. 10020180

An overview of our PLAY AND ACTIVITY PANELS is available on page 101.

FAVOURITE SPOT FOR THE LITTLE ONES

Anne-Marie Fort,
Sales Manager France

This inclusive play course is a true all-rounder! Perfect for the youngest explorers in daycare centers, kindergartens, and public spaces, it gives every child the opportunity to easily access the play and activity panels, fostering creativity. Children can let their imagination run free, explore at their own pace, and above all, enjoy moments of shared play and interaction with others. It's an installation that perfectly meets the needs of inclusion and community.

The play and activity panels can be endlessly expanded and ideally adapted to any location.

- Perfect for nurseries and children with special needs
- Play and activity panels endlessly expandable

Altena

Consists of:

- a variety of low to the ground, interactive play and activity panels
- counter with stool
- crawl tunnel featuring a peek-through window

Technical specifications:

PLAY STRUCTURES FOR PRESCHOOLS

PLAY EQUIPMENT WITH A PLATFORM HEIGHT OF UP TO 90 CM

Children need to move – not just for muscles and stamina, but also for imagination, coordination, and self-confidence. Playgrounds give them the space to explore, climb, balance, and share adventures together. When movement is fun, children grow up healthy – strong in body and mind.

Platform heights

Our height guidelines provide you with equipment recommendations based on the child's age.

PLAYGROUND COMBO

PLAYGROUNDS COMBINED WITH CLIMBING ROPES

With children, we see the world anew: from a different perspective, full of curiosity and ideas. What seemed obvious yesterday is questioned today – and from this arise the ideas that bring playgrounds to life: places where children can explore, experiment, and grow.

Play Solution

SPACE SAVER

REACHING NEW HEIGHTS IN SMALL SPACES

Even in a small space, children can enjoy big adventures. Our compact playgrounds offer everything kids need: climbing, balancing, running around, and letting their imagination run free – perfectly tailored to any area. Despite their size, they are sturdy, safe, and thoughtfully designed, allowing children to explore freely and try out their own ideas. Because even a small playground can be a world of adventure, inviting children to discover, move, and simply be kids.

PLAY WORLD "FANTASIA"

VIBRANT COLOURS, HIGH PLAY VALUE AND CUSTOMISABLE OPTIONS.

Children naturally love to play – outdoors, indoors, and anywhere they can explore their world. Playgrounds provide exactly this space: places to climb, balance, run, race, and develop their skills. To do what children love most, you don't need countless pieces of equipment, but thoughtfully designed, sturdy, and child-friendly playgrounds that spark imagination and invite exploration. When children have fun, can move freely, and contribute their own ideas, it provides the best kind of support – for creativity, courage, and self-confidence.

PLAY
TOGETHER!

Ramona Kummer,
Marketing Manager &
mom of two daughters

CLEVER DESIGNS FOR LITTLE ONES AND BIGGER ONES

As a mom of two girls of different ages, I value this play equipment because it offers exactly the right experience for both. The younger ones explore their world safely and playfully, while the older children embark on daring adventures and master new challenges. This creates a shared space where every child finds their place, learns from one another, and cheers each other on. Moments like these make family life special and truly unforgettable.

Serelune

Consists of:

- 5 different climbing and access options
- a variety of interactive play and activity panels
- 2 plastic slides with HPL side panels

Technical specifications:

Dimensions (L/W/H):	510 x 400 x 440 cm
Safety zone (L/W/H):	880 x 770 cm
Max. free fall height:	150 cm
Platform heights:	60, 120, 150 cm
Number of foundations:	15
Fall protection recommendation:	5 - 9

“The large play structure with the tube slide, Fantasia, is the absolute highlight!”

– Mrs. Enns, a client from Baden-Baden, Germany

“We are truly soo happy with our new playground!

The large Fantasia play structure with the tube slide is the absolute highlight for the children – it’s used intensively every single day and is a huge hit. The rope pyramid and the other play structures also complement the offer for the children perfectly. Despite the challenging weather conditions in December – it was quite muddy – the installation went smoothly. Using screw foundations was a clean and quick solution that worked brilliantly.

The entire process was professional, friendly, and reliable. We feel very well looked after and are absolutely delighted with the result.

Many thanks to the whole team!”

Quelle: Fotografin Kathi Lepper

Solancia Play Structure - Custom Design

- PE tube slide with transparent sections
- short assembly time due to pre-assembly and use of screw foundations

Andreas Bittermann,
Managing Director and dad of
1 daughter and 1 son

**THE GREATEST REWARD OF MY WORK?
THE CHILDREN’S SHINING EYES**

As a father of two and managing director, the safety and quality of our outdoor play equipment are particularly important to me – I want children to be able to play freely and without worries. With my technical expertise in metal construction, I make sure every play structure is assembled properly – and depending on the situation, I also lend a hand myself, gaining valuable practical experience. My goal is to guide our customers with expertise from the very first idea, through planning, all the way to the finished installation. They can enjoy a smooth, transparent, and reliable process from start to finish.

INDIVIDUALLY COMBINED

IMAGINATION AND CREATIVITY

Children have their own rhythm and, above all, want one thing: to be themselves. Their curiosity, imagination, and joy in movement need space to unfold freely. Our playgrounds provide opportunities instead of limits, inviting children to run, discover, and explore – while standing up to even the wildest adventures. Because when children are free to simply be children, they grow strong into life.

Judit Dippold,
International Sales Executive and
mother of one daughter.

OUR CASTLE WORLDS - NOT JUST FOR BIG KNIGHTS

Even the tiniest adventurers have plenty to explore in the castle. My two-year-old daughter is already discovering the first levels, climbing higher step by step and gaining confidence along the way. It's not just her motor skills that are growing – her self-confidence is too! With so many different play options, the castle becomes a true world of adventure, engaging children of all ages and offering challenges for everyone. Soon, Ola will even be brave enough to tackle the climbing tube!

ROYAL FORTRESS

PLAY LIKE ROYALTY

With our castle playgrounds, the adventure begins with the very first step. Little explorers can step into different roles, conquer dragons, climb secret towers, or join the castle guards on patrol. The detailed play structures spark the imagination, invite climbing, balancing, and create a space where stories come to life. Brave, clever, or curious – every role is possible, and every discovery is a new adventure.

THE SKY IS THE LIMIT - GET A GRIP!

WHERE PLAY CLIMBS TO NEW HEIGHTS

Climbing pyramids are pure excitement and adventure. Step by step, children climb higher, testing their courage, skill, and balance along the way. Reaching the top brings pride—and a thrilling view across the playground. These climbing structures encourage movement, coordination, and self-confidence, giving kids the joy of discovering new heights and stretching their own limits.

Durable Hercules-Quality Ropes.
The internal steel cables make the ropes virtually indestructible.
Available in 5 colours.

Rounded, solid, and bolted metal cast fittings keep the ropes securely in place.

Play World **CLIMBING**
for little and big adventurers

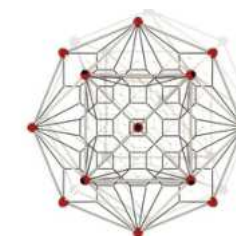

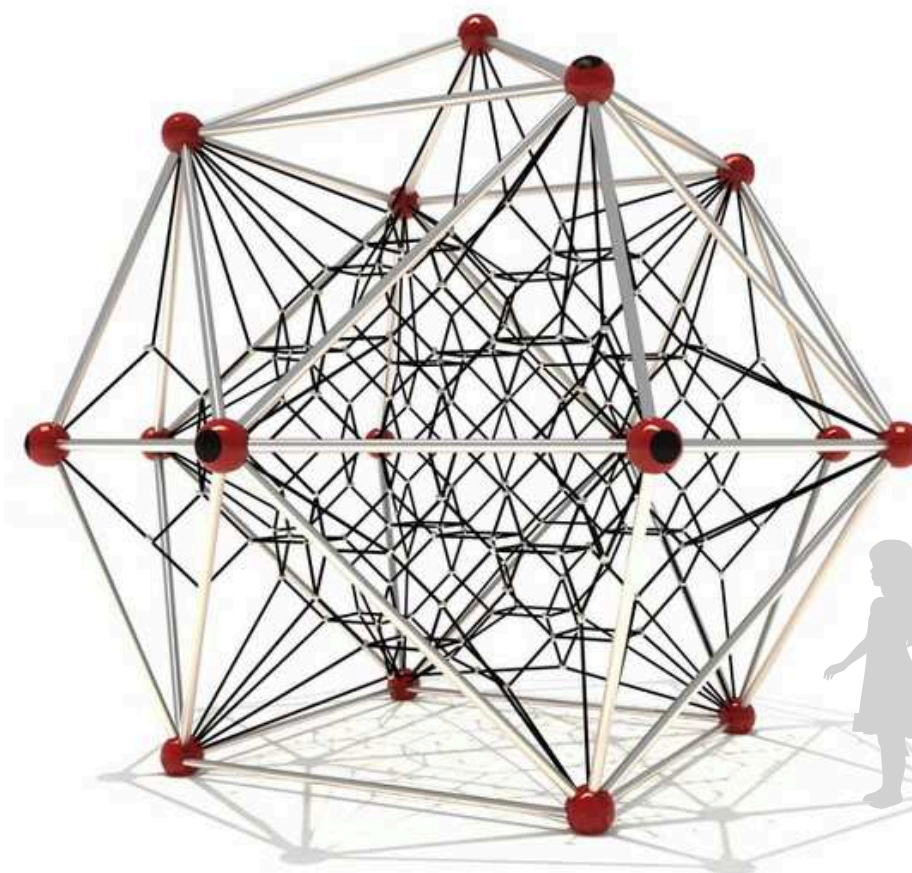

ADVENTURE INSTEAD OF BOREDOME

Nicole Przytulla,
National Sales Representative
and mom of 1 daughter

OUR CLIMBING STRUCTURES THE ULTIMATE SOLUTION FOR INACTIVITY

As a mother of a teenage girl, I know how challenging it can be to get older kids excited about outdoor activity. Our climbing structures and adventure courses make it possible: they invite children to test their limits, tackle new heights, and have fun together. Whether climbing, balancing, or swinging, these structures not only build strength but also boost confidence, teamwork, agility, and coordination. With their modern design and robust construction, they quickly become the centerpiece of any playground, schoolyard, or leisure park. They provide children and teens with space to play freely, enjoy adventures, and take pride in their own achievements.

Play World **CLIMBING**
for little and big adventurers

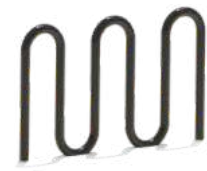

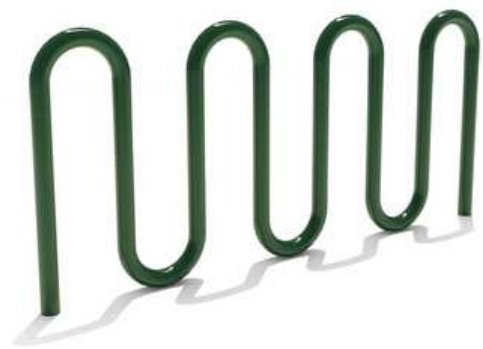

CLIMBING PARKS

STRENGTH AND ENDURANCE REQUIRED

Adventure for the older ones: with our "Game of Trails" series, the playground becomes a space for active challenges. Demanding climbing elements, exciting routes, and varied movement tasks push older children to test their limits. The designs are less whimsical, focusing instead on activity, skill, and action. Curious? We'd be happy to provide detailed information upon request.

Our climbing structures come in many exciting variations. **Interested? Get in touch with us!**

Play World

Sand play - Swings - Seesaws

Small but Mighty

Even small play structures can make a big impact. They complement the playground at the edges and open up additional opportunities for discovery, experimentation, and shared play. Whether it's sand play, balancing, or rocking, these elements encourage creativity, skill, and movement in a playful way. Small adventures like these add variety to the playground and bring even more joy to everyday play.

FUN SPRING RIDERS

MY FIRST SPRING RIDERS

The rockers with a wide seat and large handlebar are especially designed to provide increased safety for younger children. The sturdy side panels and footrest prevent sideways slipping, while the wide handlebar at head height significantly reduces the risk of accidental head contact.

EVERYDAY MOVEMENT

SMALL ISLANDS FOR BIG EXPLORERS

Play doesn't always need a large space: even small, standalone play structures bring movement to urban areas. Whether in parks, squares, or along pathways, they invite children to balance, rock, or climb in between activities. These little play islands add variety to the city, spark joy in movement, and significantly enhance everyday experiences.

A PLACE TO PAUSE

A MEETING POINT FOR PLAY AND BREAKS

A playground is more than just a place to play – it's a meeting point for the whole family. Benches, bike racks, and picnic tables make the stay comfortable and invite visitors to linger. Parents can relax while watching, children can take a break, or families can enjoy time together. Practical, robust, and thoughtfully designed, these elements are the perfect addition to any playground.

Excellence in Every Detail

From consultation to installation

1 Consultation

Our experienced team supports you every step of the way – from the initial idea, through planning, to successful implementation. Personal, professional, and hands-on.

2 Play Value

Our playgrounds are designed to inspire, challenge, and delight – refined through decades of experience.

3 Modularity

Our well-designed and field-tested play structures can be flexibly adapted to your needs, local conditions, and target groups thanks to their modular system. Perfectly tailored to your on-site requirements.

4 Quality

When it comes to materials and craftsmanship, we don't compromise. Our goal is to create exceptionally durable, low-maintenance play equipment that provides lasting fun.

Safety

We take safety seriously. Safety is built into the design, with ongoing quality checks and certification by accredited bodies. Safety – without compromise!

Installation

Our outdoor play equipment is designed for quick and hassle-free installation. We support you throughout your project, so you can benefit from our many years of experience.

6

Discover more about your benefits on the following pages!

1 Consultation

Why are customers and partners excited about QualiTerra?

Since 2023, QualiTerra has been operating in Germany and distributing high-quality premium playground equipment across Europe. Our true heart lies in our team, united by one core expertise: play – age-appropriate and developmentally supportive. Together, we bring over 80 years of experience to the table. As parents ourselves, we know first-hand what matters when it comes to safe, innovative, and child-friendly play equipment. We adapt to a wide range of on-site conditions and find fast, practical solutions to many challenges. Whether it's educational design, safety considerations, project management, budgets, or tenders – we support you every step of the way to make your playground project a success!

2 Play Value

Why are children excited about QualiTerra?

Our play equipment becomes the centrepiece of any playground. Children are drawn to it immediately – the pleasant materials and smooth, rounded edges invite play, splinter-free. Only the parts that are meant to move wobble; everything else is rock-solid, giving children a sense of safety and security.

Depending on the age group, the play equipment offers simple climbs and slides or small challenges. Panels with theme-based play features – such as a shop, car, races, and much more – complement the experience.

3 Modularity

Why Can QualiTerra Respond Flexibly to Your Needs?

QualiTerra playground equipment is coherent, tested, and proven. Yet, due to on-site conditions or individual requests, modifications may sometimes be necessary.

Our entire range is designed as a modular system, allowing us to react quickly and flexibly.

Whether it's swapping slides, changing panels, colours, or elements, or adapting to spatial requirements – nothing stands in the way of a customised solution.

Want to create your own colour scheme?
Choose from 28 different colours for panels and board elements.

4 Quality

Why do QualiTerra playgrounds bring lasting joy?

Playgrounds are places full of life, motion, and social interaction. They need to do more than look good – they should provide lasting joy and stand the test of everyday use.

Our equipment is built on over 30 years of experience in design and manufacturing. Each piece is thoroughly tested, continuously refined, and carefully considered down to the smallest detail. It's in these key structural elements that our know-how lies – providing real added value for everyone involved in the project and, most importantly, bringing joy to the children.

Corrosion-resistant aluminium posts

Wood, steel, aluminium – which supporting beam is the right choice? We believe that a durable, low-maintenance solution offers significant advantages today. Our aluminium posts are extremely sturdy, rust-free, and thanks to their wood-effect coating, still create a warm and inviting atmosphere.

Square post 11 cm diameter

- ✓ Wood Effect
- ✓ Fire Safety Compliance
- ✓ Modular Design
- ✓ Low Maintenance
- ✓ Long-lasting Strength

Round post 12 cm diameter

QualiTerra strengths

- + corrosion-resistant aluminium posts
- + various foundation options
- + smart platform solutions
- + adjustable roofs and slides
- + quality control through in-house production

Certified to the highest standards – by accredited bodies

Joint with system

Thanks to the mounting slots, all fastening elements can be quickly and easily moved and installed.

A special advantage during installation:

all elements are pre-assembled at the correct height in the factory – saving you valuable time on site.

Foundations? Tailored specifically to your needs!

Every foundation is individually designed and structurally calculated for each play unit. We adapt to the local conditions and your preferences – **whether cast directly in concrete**, fixed with a **mounting foot on a foundation** or installed with innovative, reversible **screw foundations**.

Advantages of screw foundations

- + short installation time
- + no concrete work required
- + immediately load-bearing
- + structurally tested
- + suitable for all load-bearing soils

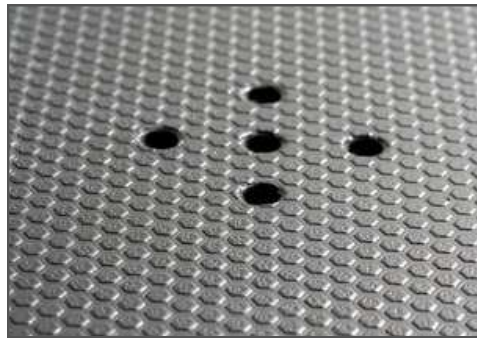

Roof options

Whether slanted, pointed, or gabled – with QualiTerra play equipment, every roof is well designed. We focus on solid construction and UV-resistant materials, ensuring that vibrant colours stay bright for many years. All roofs are built on an extra-sturdy frame made of rustproof stainless steel (V2A).

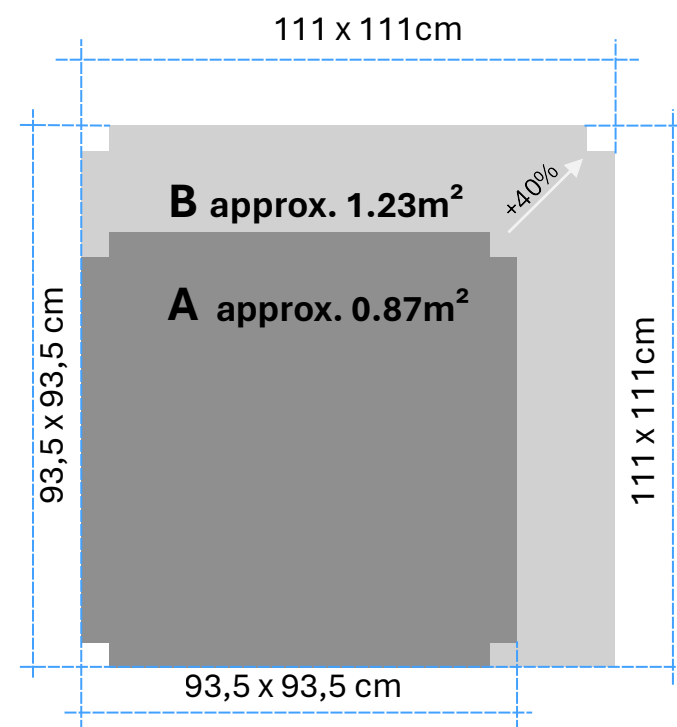

Platforms

Together with the support posts, platforms are among the most important structural elements. In addition to stability, we focus on slip-resistant surfaces and effective drainage for water and sand. Combined with our slot system, this creates a permanent, force-fit connection between platforms and posts – ensuring maximum stability.

Anti-slip surfaces

Platform Size Comparison

Option A

For all units in the Fantasia series, we use durable solid plastic platforms with an ultra stable honeycomb structure.

Option B

For all other units, we use a sturdy base frame with a crossbeam made of rustproof stainless steel.

Slides

At QualiTerra, you can choose from a variety of options. We offer slides with the classic stainless-steel sliding surface, but for younger children – or to reduce surface temperature – this can easily be replaced with a polyethylene (PE) surface.

In addition, we can provide full-plastic slides as well as tube slides in either plastic or stainless steel. Thanks to our in-house production, we are able to meet almost any individual request.

HPL & PE

HPL & Stainless Steel

Stainless Steel

Polyethylene

Tube Slide - Polyethylene

Tube Slide - Stainless Steel

Panel Material

For our decorative elements, we use high-pressure laminate (HPL) panels from the market leader Formica. For additional decorative parts or, for example, many of our spring riders, we rely on durable polyethylene (PE). Beyond their vibrant colors, both materials have proven themselves with outstanding durability and minimal maintenance over many years of use.

Advantages of our panel material

- ✓ **Splinter-free and child-safe**
No risk of injury from sharp edges or splinters
- ✓ **UV and weather-resistant**
Perfectly suited for long-term outdoor use
- ✓ **Water and moisture-resistant**
Will not swell, remains stable even in rain
- ✓ **Impact and break-resistant**
Safe against vandalism and heavy use
- ✓ **Extremely robust and durable**
Built to withstand the elements for years

Material advantages:

Unlike conventional wood or plastic, our HPL compact laminate panels stand out for their exceptional durability: scratch-resistant, moisture and heat-resistant, and extremely low-maintenance.

5 Security

What ensures that children can play safely on QualiTerra equipment?

- ✓ **Safety from the start**
We consider potential risks during the design phase and build our equipment to prevent them from arising in the first place.
- ✓ **Certified quality**
All our play equipment is tested and fully compliant with European standards EN 1176 and EN 1177.
- ✓ **Experience and continuous improvement**
Years of experience in playground construction have made us better every day. We know what matters and eliminate even the smallest hazards.
- ✓ **Ongoing monitoring**
Safety doesn't stop at delivery. We conduct regular checks, oversee installation and consultation and continuously look for improvements.
- ✓ **Continuous training**
We maintain constant contact with certification bodies and playground inspectors, ensuring ongoing professional development.

Fall protection material

When selecting a play structure, it is equally important to choose the appropriate fall protection material to ensure safety. Below you will find examples of possible fall protection options that comply with standards. We are happy to assist you in selecting the right material and provide detailed guidance.

Number	Floor material	Description	Minimum layer thickness	Maximum possible free fall height
1 (GER)	Concrete/stone	Paving		≤ 600mm
2 (GER)	Bitumen/asphalt	Asphalt		≤ 600mm
3 (GER)	Topsoil	Topsoil up to Dicke 20 – 30 cm		≤ 1000mm
4	Grass	Maintained grass area		≤ 1000mm (EUR) ≤ 1500mm (GER)
5	Bark mulch	Particle size 20 - 80 mm	200mm 300mm	≤ 2000mm ≤ 3000mm
6	Wood chips	Particle size 5 – 30 mm	200mm 300mm	≤ 2000mm ≤ 3000mm
7/8	Sand or gravel	Grain Size 0,25 – 8 mm	200mm 300mm	≤ 2000mm ≤ 3000mm
9	Synthetic safety surfacing	As tested according to EN 1177		As tested

DIN EN 1176-1:2017-12 (D)

6 Installation

What makes the installation of QualiTerra equipment so easy?

With most modular systems, the fun often ends when it comes to assembly – drilling holes, making adjustments, following the “force it until it fits” approach.

QualiTerra is different. Our outdoor play equipment is fully assembled at the factory right after production. All components are precisely positioned and adjusted to ensure perfect fit and quality before shipping. The equipment is then disassembled into practical modules, so no time-consuming measurements are needed on site. Each part is clearly labeled, saving time and ensuring the play structure is quickly and easily ready for use.

QualiTerra advantages of installation

- ✓ Full factory assembly
- ✓ Fit and accuracy checked
- ✓ Disassembled into modules
- ✓ Play & partition panels pre-assembled
- ✓ Clearly labeled components
- ✓ Step-by-step instruction
- ✓ Easy, hassle-free installation

"As an installer, I especially appreciate QualiTerra play equipment – its well-thought-out system allows for quick and easy assembly. No matter the surface, installation runs smoothly without any nasty surprises."

Axel, Installer from France

Installation by our team is carried out by experienced professionals, ensuring everything is delivered on time, compliant with standards, and ready for use.
